Jorean L. Mott-Sir : In reply to yours of this date,

The Revertable F ue is the only arrangement I have seen by which baking cau be done as even on all sides, top and bestom as in a bri k oven.

The case with which any defective part can be removed and renewed, revers the sove lasting and economical—and the extreme apritude of all the parts show it to have been the result of cortly experie ce rather than an accidential compliation. As a while the stove exchodies more practical skill is its construction, and is better adapted to

dearth compilation. As a wayle the stove exhouse more practical skill is its construction, and is better adapted to the several uses of the kitches than any other that has come under my notice.
